

Ramset™

RLM50 Laser Measuring

Laser measuring

Fast accurate measuring up to 50 metres. With the small size and soft grip rubber sections the RLM50 is a very easy to use, robust tool.

Features and Benefits

4 references for measuring

- From front end
- From back end
- From tripod $\frac{1}{4}$ diameter screw
- From measuring pin for inaccessible places

Very Easy to use

- Measure area volume or indirect measurement
- Memory function

Specifications

Measuring range	0.05 ² - 50
Measuring accuracy (min)	+/-1.5mm
Measuring accuracy (max)	+/-3mm
Measurement time	0.5s (min) / 4s (max)
Laser diode	635nm, <1mW
Laser class	6
Laser diameter	6mm @ 10m 30mm @ 50m
Automatic switch off	5min (tool) 30s (laser)
Battery usage	Approx 30,000 measurements

Special Features

Pythagoras function

Tripod attachment

Measuring spike

*Supplied complete with carry case
