

Ramset™

P230

High powered cartridge tool

High powered cartridge tool for structural steel applications such as HiBond and cladding. Easy to use, semi-automatic and efficient. The P230 offers the contractor high power and patented safety systems when fixing steel to steel.

Features and Benefits

- Reliable - the MAC (Piston Control System) is exclusive to Ramset. The piston is captive improving safety and control.
- The nail will not pass through the steel sheet if it is not driven into the base material
- Fixes steel from 5mm thick to structural steel

Specifications

Weight	3.2kg
